Inslab heating

Inslab heating is a highly popular, low-cost solution to heating polished or coloured concrete floors in new homes and extensions. An electric heating element is installed after the reinforcing mesh has been added and prior to the concrete being poured.

Unlike other heating methods which provide rapid response heating, inslab heating is designed to provide gentle background warmth.

Effective installation and correct operation and control will ensure maximum cost-effectiveness. Inslab heating can be installed in selected rooms, all of which allow individual control.

Product Range / Sizing Guide

MODEL	LENGTH	WATTS
INSLB 500	17.0m	500
INSLB 750	25.0m	750
